## Projects

### Quiz App

2023 - current

- Creating a Mobile based app game for children with interactive designs and challenging quizzes with life and time limit.

### Aqua App

2022- current

- Creating a Mobile based app which is portable and compact for managing bills and waterworks meter readings.

### Aqua Waterworks

2022- current

- Creating a Web based system for waterworks for managing bills, transactions, liquidation and track records of consumers, creating bills and payments.

## My Profile

As a junior software engineer, my goal is to offer my knowledge and abilities to a dynamic development team, receive hands-on experience in designing solid and scalable software solutions, and continue to grow as a professional in the field of software engineering.

## Education

Bachelor of Science in Computer Science  
Bohol Island State University

2018-2022

## Experience

Junior Software Engineer

Vijaya Technologies Inc.

2022- Present

- Wrote code for back-end API using GoLang.
- Tested 100% of code and applications using testing techniques such as unit testing and integration testing.
- managing PostgreSQL Database and also wrote store procedures and scripts for automated database backups.
- wrote code for mobile application using react-native and managing SQLite database.
- Created and oversaw wire-frame designs from client requests.

Research Assistant

Sourceum Research

2021-2022

- Assisted in preparing of candidates for screening.
